PROJECT HIGHLIGHTS

New Orleans VA

Responsible for the entire IOT&A project for the Southeast Louisiana Veterans Healthcare System's new 1.6 million square foot, state of the art hospital. JD&A managed all warehousing, transportation, biomedical safety inspections, transition planning, and overall project management. Our ability to work with the hospital staff and senior leadership has earned us numerous accolades on this flagship facility. This project was completed on schedule and within budget.

MedSurg Unit

A complete Medical/Surgical unit was renovated and re-designed to provide a modernized facility with new equipment and FFE. A complete relocation and transition plan was developed by JD&A to manage this state of the art 40 bed patient unit and surrounding support spaces. A complete initial outfitting and transition program was developed and implemented. This project was completed within budget and schedule.

Women and Children's Hospital

JD&A provided complete IOT&A for multiple areas of a women and children's hospital with the latest technology and equipment on the market today. A complete initial outfitting and transition program was developed for several areas of this facility. The work was completed in an occupied patient facility with minimal impact to operations. This project was completed within budget and schedule.
